DETAILED ACTION

Allowable Subject Matter

1. Claims 1, 6-15, and 20-29 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art of record fails to teach or make obvious the steps of or means for **"parsing the information packets into lengths of one cell; transferring one cell from the selected information packets every decision cycle; transferring one cell every decision cycle until no further cells remain in the selected information packet; and after completing the transfer of the information packet cells, simultaneously performing a deficit round robin reanalysis of the information packets at the head of each queue"**, when such steps are considered within the specific structure of the method recited in claims 1 and 6, or the device recited in claim 15. The prior art of record fails to teach or make obvious the steps of or means for **"a parser having an input connected to the output of the analyzer, the parser processing selected information packets in units of one cell, the parser having a second input to accept decision cycle timing signal and an output to transfer one cell from the selected information packet every decision cycle, until no further cells remain in the selected information packet"**, when such parser is considered within the specific structure of the device recited in claim 22.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
